## EDUCATION

**Web Development Immersive, General Assembly** 2014

Three-month intensive program in full-stack Ruby on Rails web development

**Tufts Gordon Institute**, Medford, MA – M.S., Engineering Management 2004

**University of NH**, Durham, NH -- B.S., Computer Science 1986

## TECHNICAL EXPERIENCE

Ruby, Rails, Rspec, Git, JavaScript, jQuery, *Angular.js*, *AJAX*, *Jasmine*, RSpec, PostgreSQL, MySQL, Heroku, Jira, Scrum/Kanban

## PROJECTS

### Bob's Bagels, <TBD Running site link>

- Ecommerce app for a Bagel shop with pickup or delivery. Technologies: Javascript & HTML UI leveraging HandleBars & Bootstrap and ajax. Connects to restful Rails API that uses JBuilder for serialization and has Rspec tests for API endpoints.
  - UI: <https://github.com/HollyM021980/CCHBobsBagelsClient-NEW>
  - API: <https://github.com/HollyM021980/CCHBobsBagelsAPI>

### Movn' There, <http://hollym021980.github.io/movin-there>

- App to help people, who are relocating. Provides ability to get stats for communities and info about places of interest within those communities. Save as favorites and annotate as they research.
  - UI: <https://github.com/HollyM021980/movin-there>
  - API: <https://github.com/HollyM021980/moving-there-api>

## EXPERIENCE (most recent)

**SecurePayOne, Contractor, Westborough, MA** 2014

- Designed and implemented functionality to record, track and reporting on maintenance issues for SecurePayOne, a rental community management app. Reduces response time for issues reported by tenants and provides transparency into status of requests.

**Constant Contact, Sr. SW Engineering Manager, Waltham, MA** 2013 — 2014

- Responsible for converting Constant Contact's monolithic SaaS code delivery process and infrastructure into Continuous Integration and Deployment, leveraging an internal OpenStack cloud. Created proof-of-concept prototype in partnership with operations and targeted development team. The team is now building and managing their deployment pipeline.

**Constant Contact, SW Engineering Manager, Waltham, MA** 2012 — 2013

- Define and implemented best practices such as paired programming, developer-created automated tests with the SaveLocal team. Resulted in a very stable code base.
- Collaborated with operations and SaveLocal team to create deploy-on-demand tools and processes. This reduced delivery of features from 4 weeks down to 1 week.
- Established processes that facilitated lean product development with rapid product iterations. This allowed the team to pivot as they learned from the users of the product.

## **OTHER WORK EXPERIENCE**
